

**Beer / Liquor Stores**

**Tobacco / Wine / Small Grocery Stores**

**Convenience Stores / Dollar Stores / Gift Shops**

**Hardware, Paint or General Retail Stores**

## NCC Reflection POS® Touch Screen Terminal

NCC Reflection POS is powered by the most feature-rich software of any product in its class. This system is designed for a wide variety of retail store concepts including General Stores, Liquor Stores, Tobacco/Vape Stores, Small Grocery, Discount Stores and Convenience Stores. Reflection POS has the functionality to meet the demands of most retail operations.

- Intel Bay Trail Celeron Quad Core J1900 Fanless Windows Processor
- Projected Capacitive Touch (PCT)
- Solid State Drive for Optimum Performance and Reliability
- 14" True-Flat Wide Screen
- Optional 80mm Integrated Thermal Receipt Printer – Modular Design For Ease of Service
- Fully Sealed Cabinet
- Choice of Black or White Cabinet Color
- Self-Healing, Fully Data-Redundant Network
- Integrated Credit Card / PIN Debit / Gift Card Processing
- Item Scanning For Up to 30,000 Products

## Reflection POS® for Retail

*Graphic screens guide operators with minimal training. Condiments, flavors, instructions and options can be placed upon one key. When an item is registered, a specific key displays the options available for the item.*

### Powerful NCC Reflection POS® Software Features

- Up to 30,000 Products
- Product Scanning
- Coupon Scanning
- Link PLU/High-Cone
- Member/Non-Member Pricing
- Mix & Match
- Not Found PLU
- Item Countdown with Automatic 86
- Ounce/Pound Scale Interface
- Time of Day / Day of Week Pricing
- Drivers License Birthdate Verification
- Price Check Function
- Customer Rewards
- Customer Charge Accounts
- Integrated Credit / Debit / Gift / EBT
- Inventory Control
- Labor Scheduling and Time & Attendance
- Self-Healing, Fully Data-Redundant Network
- Online Ordering Option and Delivery
- Available Loyalty Module
- Food Stamp Sorting and Tendering
- End-of-Day Data Sent to a Corporate FTP Site
- Interface to Optional Insight BackOffice™ Software

### No Single Point of Failure

NCC Reflection POS is equipped with the most sophisticated, terminal-redundant network on the market. Using the integrated high-speed Ethernet, all system information is replicated on every terminal across the TCP/IP network. If a terminal is removed from the LAN, all information is automatically synchronized when the terminal re-enters the network.

### Inventory

An integrated inventory system accurately tracks product usage. Item count down feature can signal the manager that a particular product is no longer available, while inventory reports provide usage details and cost information.

### Built in Time Clock

Using the available time clock feature, NCC Reflection POS will help managers capture the valuable information necessary to control labor costs. Employee clock in/out procedures can either be performed by numeric entry, magnetic card or digital I-Button. Security levels assigned by job codes provide the controls necessary to access POS functions. Detailed time clock reports will provide employee punch time data with accumulated pay period totals, as well as additional reports to provide critical labor to sales information.

### Programming

With NCC Reflection POS, no back office PC is required to make changes or additions to the system tables. All item, employee, screen design, etc., changes may be performed directly on the POS terminal in an easy to use programming mode using an on screen touch keyboard. Changes are accomplished easily and are immediately available to all stations in the POS system.

### Extensive Reporting

NCC Reflection POS has a wide range of real time reports. Reports can be

obtained locally at each station or on the back room PC if equipped with the optional PC Workstation software. Report data can also be exported and communicated via FTP push or poll methods for use with other reporting solutions. Detailed information can be obtained by station, system, revenue center, user and many more.

### NCC Reflection POS® Certifications

 NCC Reflection POS is validated by an independent Qualified Security Assessor to meet or exceed PCI requirements for card payment processing.

 NCC Reflection POS is also validated by National Weights and measures to meet requirements for integrated electronic scales.

### HK718 Features and Specifications

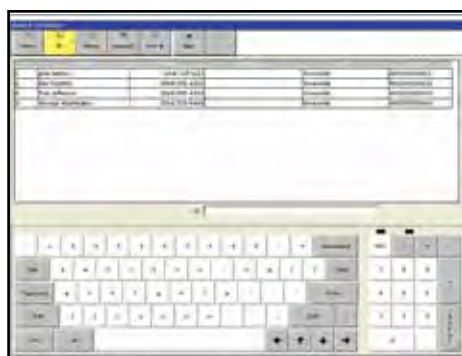

The Hisense HK718 integrated touch screen terminal is the ideal host for NCC Reflection POS™ Software. The high performance terminal features the powerful Intel Bay Trail Celeron Quad Core CPU to reliably and efficiently power demanding POS applications in general stores, liquor stores, small grocery, discount stores and convenience stores. The HK718 BIOS is specifically configured for optimum performance with NCC Reflection POS Software.

# HK718 NCC Reflection POS® Touch Screen Terminal

*An integrated inventory system accurately tracks product usage.*

*No back office PC is required to make changes or additions to the system tables.*

**Choose the platform that best suits your business...**

## NCC Reflection POS® Embedded

The Embedded Reflection application runs on an embedded real-time operating system. Because Windows™ is not deployed, you have the security of knowing that your staff is unable to open the Internet on your POS station, run other applications or inadvertently load viruses or spyware. Your NCC embedded application is installed on an 8GB SSD, not a hard disk drive, providing additional speed and exceptional reliability. For unprecedented savings, security, reliability and redundancy, NCC Reflection POS Embedded is the preferred NCC platform.

## NCC Reflection POS® for Windows

The same reliable Reflection application can be installed on a Windows™ operating system platform. Reflection for Windows allows the possibility of running applications other than NCC, performing remote file maintenance, or using Datacap Systems NETePay™ rather than a Datacap Tran™ device. The Reflection Windows™ version will also support an optional rear LCD customer display screen as well as other standard Windows peripherals. Consult with your NCC Reseller to determine which Reflection operating system platform is best suited to your needs.

The attractive, powerful Hisense HK718 NCC Reflection POS is ideal for installations including retail scanning and many more like these:

- Airport Kiosks / Mail Kiosks
- Amusement Parks
