

SmartECR® Brings Wireless EMV to Electronic Cash Registers

EMV payment solutions can be hard to install, hard to support, and expensive. SmartECR solves these issues with a single device.

SmartECR® is an all-in-one, semi-integrated payment solution that provides merchants using SAM4s cash registers the ability to accept EMV chip cards from their customers.

SmartECR supports several SAM4s ECRs, including the ER-285, ER-900 series, SPS-300 series, SPS-500 series and SPS-2000 series.

WHY IS EMV SO IMPORTANT?

EMV technology helps make payment transactions more secure. What's more, merchants not using terminals that process EMV chip card transactions are liable for costly chargebacks caused by fraudulent payments.

SmartECR IS AN ALL-IN-ONE EMV SOLUTION

As a full-featured, affordable package, SmartECR includes:

EMV-ENABLED TERMINAL. This device, with optional wireless capabilities, converts SAM4s cash registers into the EMV-certified SmartECR.

- Accepts EMV chip cards, which protects against fraud and costly chargebacks
- Supports all payment options, including digital wallets like Apple Pay
- Easy installation via plug and play app from Sterling
- PCI-PTS 3.0 certified — in other words, "out of scope" of PCI because the terminal does not collect, process or store credit card data.

BRIDGE BUSINESS INTELLIGENCE®. SmartECR includes software that provides sales reporting and pricing management from any internet-connected device.

- Get reports from single or multiple cash registers
- Run reports by hour, employee, payment type and more
- Real-time and historical data
- Exports reports to software programs such as QuickBooks and Microsoft Excel
- Add, change and delete products and pricing

WIRELESS OPTION. SmartECR uses the largest and most reliable data network in the U.S. to provide you with fast, secure payment processing.

- Installs in any environment
- Less wiring and troubleshooting
- Enables Sterling to provide remote support
- Perfect for hard to wire locations such as stadiums, kiosks, outdoor or mobile merchants, event vendors and multi-location businesses
